# **compte rendu du projet post form**

---

**BTS 2021-2023**

# Sommaire

---

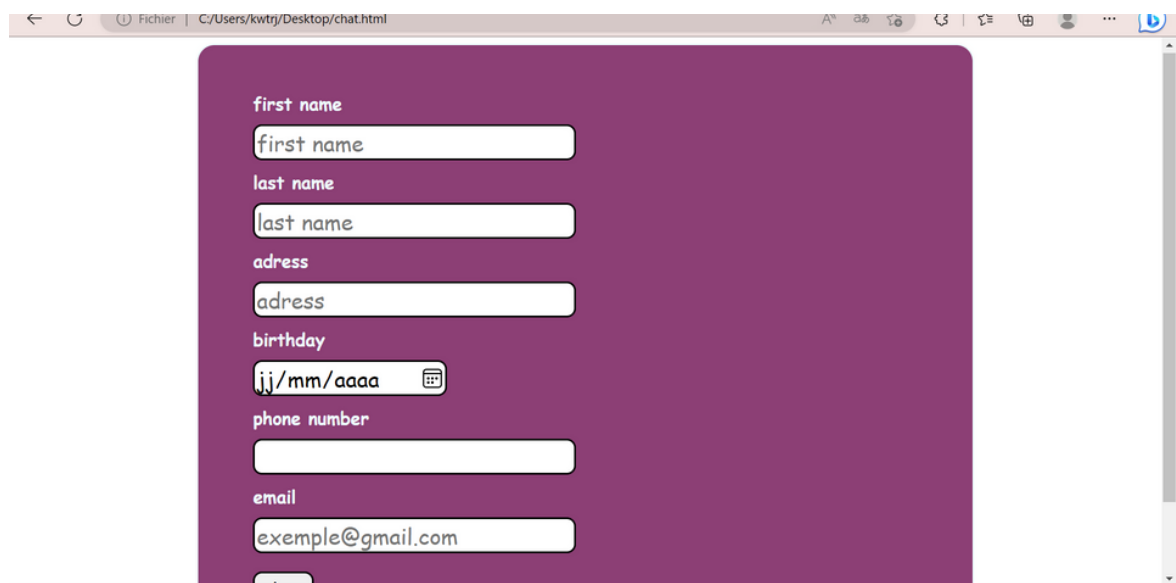

- 01.** Introduction
- 02.** Le résultat attendu du projet
- 03.** Présentation et explication  
du code
- 04.** Conclusion

# Introduction

Ce projet est mon tout premier projet en développement web fait en html css php

## Résultat attendu

Créer un formulaire qui permet de collecter les informations des utilisateurs et les envoyer vers un message de confirmation.

hello kaoutar, we're happy to tell you that we saved your informations.  
Please make sure the informations bellow are correct :  
first name : kaoutar  
last name : jabri  
birthday : 25-11-2000  
if we need more we'll send you an email to kwtrjabri@gmail.com or call you on  
your phone number 0636016867";

# Presentation et explication du code

Le formulaire suivant est pour entrer toutes les informations des utilisateurs

```
Go Run Terminal Help exercise_formulaire.php - portfolio - Visual Studio Code
exercice_form-script.php exercise_formulaire.php X exercise_formulaire.css about.html in ...
C:\MAMP\>htdocs>cours-php>exercice_formulaire.php
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta http-equiv="X-UA-Compatible" content="IE=edge">
6 <meta name="viewport" content="width=device-width, initial-scale=1.0">
7 <link rel="stylesheet" href="exercice_formulaire.css">
8 <title>EXERCICE DE FORMULAIRE</title>
9 </head>
10 <body>
11 <form class="form" method="post" action="exercice_form-script.php">
12 <label for="fname" class="lfname">first name</label><br>
13 <input type="text" name="fname" id="fname" class="first" placeholder="first name" required><br>
14 <label for="lname" class="llname">last name</label><br>
15 <input type="text" name="lname" id="lname" class="last" placeholder="last name" required><br>
16 <label for="address" class="ladd">address</label><br>
17 <input type="text" name="address" class="add" placeholder="adress" required><br>
18 <label for="date" class="lbd">birthday</label><br>
19 <input type="date" name="date" id="date" class="bd" placeholder="birthday" required><br>
20 <label for="fnumber" class="lfnumber">phone number</label><br>
21 <input type="tel" name="fnumber" id="fnumber" class="fnumber" required><br>
22 <label for="email" class="lemail">email</label><br>
23 <input type="email" name="email" class="email" id="email" placeholder="exemple@gmail.com" required><br>
24 <input type="submit" name="submit" value="okay" class="ok">
25 </form>
26 </body>
27 </html>
```

ensuite le code php suivant récupère toutes les informations et affiche le message de confirmation

```
Go Run Terminal Help exercice_form-script.php - portfolio - Visual Studio Code
exercice_form-script.php exercise_formulaire.php X exercise_formulaire.css about.html in ...
C:\MAMP\>htdocs>cours-php>exercice_form-script.php
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta http-equiv="X-UA-Compatible" content="IE=edge">
6 <meta name="viewport" content="width=device-width, initial-scale=1.0">
7 <link rel="stylesheet" href="exercice_formulaire.css">
8 <title>exercice form script</title>
9 </head>
10 <body>
11 <div class="script">
12 <?php
13 $fname=$_POST['fname'];
14 $lname=$_POST['lname'];
15 $bd=$_POST['date'];
16 $add=$_POST['address'];
17 $num=$_POST['fnumber'];
18 $email=$_POST['email'];
19 echo "hello $fname, we're happy to tell you that we saved your informations.
20 <br>Please make sure the informations bellow are correct :
21 <br> first name : $fname <br>last name : $lname <br>birthday : $bd <br> if we need more we'll send you
22 <br>";
23 </div>
24 </body>
25 </html>
```

# Conclusion

---

Ce projet était mon premier projet en web et m'a permis de découvrir le développement web
